i3 System File Types

PORTABLE DOCUMENT FORMAT (*.pdf)

Portable Document Format (PDF) is a file format developed by Adobe to present documents, including text formatting and images, in a manner independent of application software, hardware, and operating systems.

Other File Types that can be converted into PDFs for use on the system.

- Microsoft Office Documents
    - Microsoft Word files (*.doc, *.docx, *.rtf)
    - Microsoft Excel files (*.xls, *.xlsx)
    - Microsoft PowerPoint files (*.ppt, *.pptx, *.ppsx)
- Images (*.jpg, *. png)
- Open Document Format (*.odf)
    - Google Documents
    - Open Office

VIDEO / STREAM (*.mp4)

Moving Picture Experts Group MPRED-V AVC (MP4) is the international standard for audio-visual coding. This is a standard Video File.

Other File Types that can be converted into MP4s for use on the system.

- Audio Video Interleave (*.avi)
- Windows Media Video (*.wmv)
- Matroska (*.mkv)
- Apple's QuickTime File Format (*.mov)
- Video Object (*.vob)
- iTunes Video File Format (*.m4v)
- PowerPoint (*.pptx, *.ppt, *.ppsx) can be exported as an .mp4 to use on the system.

Note: YouTube and Vimeo Video Embedding in a PowerPoint (.pptx, *.ppt, or *.ppsx) does not export to playable media in the video format.*
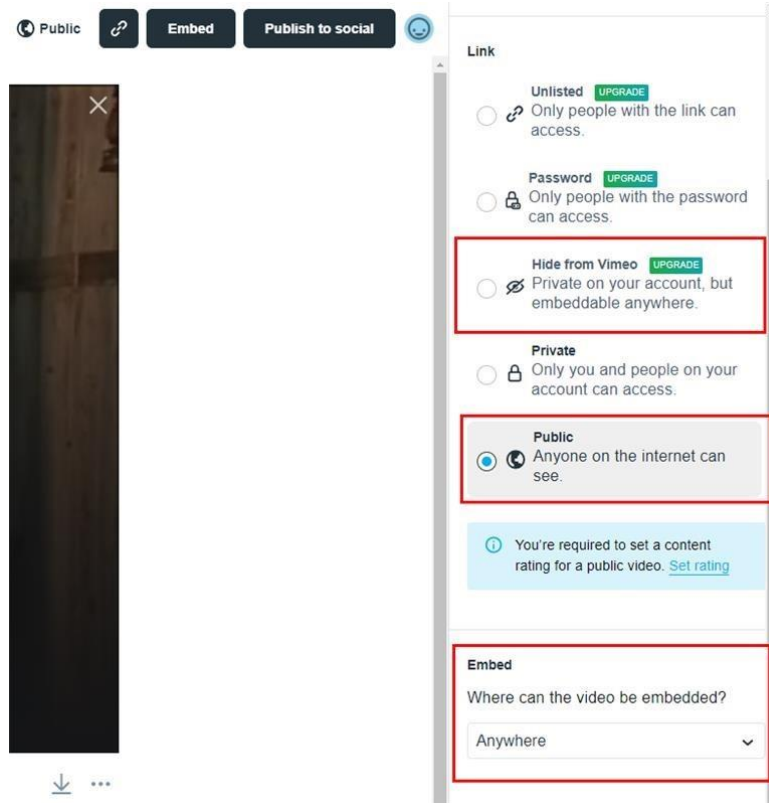

VIMEO (Vimeo Site Embed / Share Links)

Vimeo is a video sharing platform that includes features such as live-streaming and customization.

We utilize the embed link of the Vimeo platform to play it through the i3 platform.

Embed Link Example: https://player.vimeo.com/video/#########

The settings represented in the image below in the Vimeo Account that hosts the video must be set for the video to show properly through our system.

YOUTUBE (YouTube Video Embed)

YouTube is a video sharing service where users can create their own profile, upload videos, watch, like and comment on other videos.

We utilize the embed link of the Vimeo platform to play it through the i3 platform.

Embed Link Example:

- **https://youtu.be/a#AAaaaAAA**
- **https://www.youtube.com/embed/a#AAaaaAAA**
- **https://www.youtube.com/watch?v=a#AAaaaAAA**

Sharable Content Object Reference Model (SCORM)

Importing to i3 using SCORM xAPI AICC and cmi5

To import a course package, it needs to be zipped up (.zip) and needs to be either a SCORM, AICC or xAPI course package.

A **SCORM** package needs to have a imsmanifest.xml file which describes the course and its content.

A **xAPI** package needs to have a tincan.xml file and needs to send xAPI statements to the SCORM Cloud Learning Record Store.

An **AICC** package needs to be zipped up with the 4 AICC descriptor files (AU, CRS, CST, & DES).

A **cmi5** package must include a 'cmi5.xml' file which includes a list of assignable units (AU) which when launched will communicate with the SCORM Cloud Learning Record Store via xAPI.

Quiz Only

A content entry can be used in the system to just convey a quiz using the i3 systems quiz engine.

Video Text Track (*.vtt)

This is the file type to upload subtitles to a video entry in the library.

Subtitle Edit is an open-source program used to generate and edit SRT and VTT files for subtitles.
